

BenchMix™ & Pilot Plant

Advanced Mixing Technologies

High Shear Lab Mixers

Ideal for product development and formula optimization

The new BenchMix model OPLB-400 is the most versatile & powerful benchtop lab mixer on the market! No other benchtop lab mixer combines power, speed and versatility all in one unit.

In many product development labs, new and modified formulas are successfully produced on the bench, however, these results cannot be duplicated when scaling to actual production runs. Admix offers guaranteed scalability! Whether you plan to make lab batches of <2000ml or up to 80-liters in the pilot, you can be assured that scalability will be accurate and produce the desired results from the lab through 10,000 US gallons.

Our engineers understand the pain of scale-up missteps during a plant start-up or reformulation first-run, and have specifically designed our sanitary bench and pilot devices for product development, simulation and scale up. All models provide predictable, repeatable results when scaling up Rotosolver dispersers or Rotostat emulsifiers from the development lab to pilot scale and full production, or these units can also be used for small batch and sample production runs.

BenchMix benefits for your lab and process

- ✓ Bring new products to market faster
- ✓ All results can be accurately scaled to production volumes
- ✓ Complete versatility with multiple high shear heads, low speed impellers and props
- ✓ The new OPLB-400 offers 3 HP at up to 12,000 RPM and handles volumes up to 20 liters
- ✓ Available with low batch level adapter
- ✓ Variable speed
- ✓ Touch panel control for simple operation includes integrated on-screen help

Ideal for pilot plant and small production runs

Pilot plant units (Rotosolver disperser model RS-02 and Rotostat emulsifier model XP-02) operate at up to 3,450 RPM with larger mix heads than our BenchMix models (refer to table below), providing the ideal tip speed and shear rate for many applications.

Pilot plant models are designed for batch sizes from 5 to 20 gallons (20-80 liters) depending upon the product viscosity, density and solids levels.

All results can be accurately scaled to production volumes. These units are also ideally suited for small batch or sample production runs.

ABOUT OUR
TRIAL
PROGRAM**

Programmable lab mixers

Our BenchMix model OPLB-300 is programmable and allows the user to select a digital readout of mixer speed (RPM) and run time for up to seven (7) separate mix head combinations.

Performance characteristics including tip speed, pumping rate and mixing intensity are displayed. This takes the guesswork out of scaling from small to large volumes. Once satisfactory results are obtained with the BenchMix, the critical scaling parameters are indicated to proceed to larger production size volumes.

Models, specifications & performance

NEW

Features	OPLB-250	OPLB-350	OPLB-375/400	XP/RS-02
Volume	1-4 Liters (0.5 - 1 gallon)	1-10 Liters (0.5 - 2.5 gallons)	1-20 Liters (0.5 - 5 gallons)	20-80 Liters (5 - 20 gallons)
HP	0.5	1.5	3	1
Output Speed (maximum RPM)	10,000	12,000	12,000	3,450
Rotosolver® Shear Impeller (stator)	1.14"	1.14"	1.14" and 1.57"	2.36"
Rotostat® Shear Impeller (rotor)	0.95"	0.95"	0.95"	2.48"
Primary Pumping Impeller	1", 1.5", 1.6", 2"	1", 1.5", 1.6", 2"	1", 1.5", 1.6", 2"	3", 3.5", 4"
Secondary Upper Impeller	N/A	N/A	1.6"	3"
Adjustable Beaker Clamp	N/A	4	4	N/A
Low Batch Adapter	4	4	4	N/A
Casters	N/A	N/A	N/A	4
Programmable	4	N/A	N/A	N/A
Scalable	4	4	4	4
Input Voltage	1/60/115	1/60/115	1/60/115-230	1/60/115-230 or 3/60/230-460
Dimensions (with stand)	45.2"H x 14.5"W x 19.25"D	50"H x 20"W x 22"D	50"H x 20"W x 22"D	40"H x 22"W x 18"D
